

Standard Operating Procedure (SOP)

Customer Credit Terms, Pending Bills & Payment Tracking System

Module: Finance & Ledger → Credit Terms & Payments	Target Route: /ledger/credit-terms
Target Roles: Accounts, Sales Managers, Sales Execs, Admin	Status: Production Ready & Active

1. Objective & Purpose

This Standard Operating Procedure defines the day-to-day workflow for managing customer credit profiles, monitoring unpaid balances, reviewing pending sales bills, and tracking committed payment dates within the unified Goodwin ERP. Consolidating all credit and collection data eliminates fragmented offline spreadsheets and accelerates accounts receivable collection across dealer, distributor, retailer, and OEM accounts.

2. Access Roles & Responsibilities

Role	Operational Scope & Responsibilities
Super Admin & Admin	Full access to configure credit limits, modify default terms, run DB migrations, and export audit reports.
Accounts Team	Daily receivables management, recording payment receipts (Pay In), inspecting bill statements, syncing customer lists from Excel.
Sales Manager	Territory credit limit monitoring, approving payment term modifications, managing delinquent accounts.
Sales Executive	Logging customer payment commitments during dealer visits (+3d/+7d/+15d), sending WhatsApp reminders, verifying stock delivery.

3. The 8 Core Customer Credit & Payment Fields

Each customer record maintained in the ERP must reflect the following 8 standardized parameters:

#	Required Field	Description & Operational Usage	Standard Options / Format
1	Customer Name & UOI	Business commercial identity with auto-assigned Unified Customer ID, dealer category, contact number, and 1-click WhatsApp follow-up link.	GW-CUST-XXXX Dealer, Distributor, OEM
2	Fixed Credit Terms & Limit	Permitted payment duration before an invoice is marked overdue, plus maximum authorized exposure with a live utilization percentage indicator.	7, 10, 15, 30, 45, 60, 90 Days Net, Bill-to-Bill, Advance Limit: ■ Value
3	Unpaid / Outstanding Amount	Live total balance owed by the customer. Displayed in high-visibility bold red if balance > 0, or emerald if fully cleared (■0). Shows overlimit warning if exceeded.	■ Currency Amount (Real-time computed)

4	Pending Bills Details	Detailed breakdown of all unpaid invoices with bill dates, due dates, paid amounts, pending amounts, and overdue day counters.	Count badge (e.g. 3 Bills) Full modal statement
5	Payment Commitment Date	Specific calendar date promised by customer to clear balance. Color-coded status: Overdue (Red), Due Today (Amber), Upcoming (Blue).	YYYY-MM-DD Quick shortcuts (+3d, +7d, +15d)
6	Material Received Time	Typical time elapsed between physical goods delivery at dealer warehouse and invoice verification/payment approval.	Same Day, Within 24h, 48h, 3-5 Days, 7 Days, On Delivery
7	Payment Cycle	Customer-wise payment pattern or rhythm for regular accounts settlement.	Weekly, 10 Days, 15/30 Days, Bill-to-Bill, Monthly
8	Order Cycle	The routine frequency at which the customer places replenishment orders.	Daily, Twice a Week, Weekly, 10 Days, Monthly, As Needed

4. Primary Workflow Tabs & Filtering

Four dedicated view tabs are situated directly above the main table to prioritize daily operations:

Tab View	Focus & Filter Criteria	Recommended Action
All Credit Accounts	Master directory of all registered customers with credit terms, approved limits, and contact details.	General account management, maintaining credit limits and cycles.
Integrated Unpaid / Pending Customer List	Filters strictly to customers who have positive outstanding balances (> 0) or active pending bills.	Daily receivables follow-up, reviewing overdue aging, recording receipts.
Payment Commitments Follow-up	Filters to accounts with active commitment dates, highlighting Overdue and Due Today commitments.	Morning collection calls, logging updated commitment dates.
Credit Limit Exceeded	Isolates customer accounts where total unpaid balance exceeds their authorized credit limit.	Risk control: hold dispatch until partial payment received or limit reviewed.

5. Step-by-Step Operating Procedures

SOP 5.1: Maintaining Customer Credit Terms & Cycles

- **Step 1:** Navigate to *Finance & Ledger* → *Credit Terms & Payments*.
- **Step 2:** Search for the customer by commercial name, UOI code, or contact number.
- **Step 3:** In the customer's table row, click the **Terms** button under *Actions*.
- **Step 4:** The *Maintain Credit Terms & Payment Details* modal will appear. Review or update:
 - **Fixed Credit Terms:** Select approved duration (e.g. 30 Days Net, Bill-to-Bill).
 - **Credit Limit:** Enter revised exposure limit in .
 - **Unpaid Outstanding:** Verify or adjust opening balance.
 - **Payment & Order Cycles:** Adjust payment cadence (Weekly, Monthly) and ordering frequency.
 - **Material Received Time:** Update lead time between receipt and payment processing.
- **Step 5:** Click **Save Credit Terms**. Changes sync immediately to both local cache and Supabase.

SOP 5.2: Setting Quick Payment Commitments (5-Second Workflow)

- When following up with a dealer on phone, setting a commitment date should be instant:
 - **Step 1:** Click directly on the commitment badge or the small **Calendar** icon in column 5.
 - **Step 2:** A quick popover opens in the row. Click **+3 Days**, **+7 Days**, or **+15 Days**, or pick a date.
 - **Step 3:** Click **Save Date**. A confirmation toast verifies the update instantly.

SOP 5.3: Inspecting Pending Bills & Printing Statements

- **Step 1:** In the customer's row, click **X Pending Bills** in column 4.
- **Step 2:** The *Pending Bills Statement* opens, listing every open invoice, invoice date, due date, bill amount, paid amount, pending balance, and overdue days.
- **Step 3:** Click **Print Statement** to print a branded statement for dispatch or collection staff.
- **Step 4:** Click **Pay In** directly next to an invoice to record a receipt settled against that specific bill.

SOP 5.4: Sending Instant WhatsApp Payment Reminders

- **Step 1:** In column 1 next to the customer's phone number, click the green **WhatsApp** icon.
- **Step 2:** WhatsApp opens with a pre-formatted message:

"Dear [Customer], this is a reminder regarding your Goodwin Battery account outstanding balance of Rs. [Amount]. Kindly confirm payment."

- **Step 3:** Tap send to dispatch the payment reminder directly.

SOP 5.5: Recording Payment In (Receipts)

- **Step 1:** Click the **Pay In** button on the customer row (or the top header button).
- **Step 2:** The customer is pre-selected and their full outstanding balance is prefilled.
- **Step 3:** Confirm Payment Date, Payment Mode (NEFT/RTGS, UPI, Cheque, Cash), and UTR/Reference.
- **Step 4:** Click **Save Payment Receipt**. The balance clears across all ERP ledgers immediately.

SOP 5.6: Importing & Syncing Offline Excel Lists

- **Step 1:** Click **Import / Sync Excel** in the top right banner.
- **Step 2:** Download the sample template to inspect required column headers (Customer Name, Fixed Credit Terms, Credit Limit, Unpaid Outstanding, Commitment Date, Material Received Time, Payment Cycle, Order Cycle).
- **Step 3:** Upload your existing Excel (.xlsx) file.
- **Step 4:** The ERP automatically matches existing customers and updates their balances and terms, while creating new profiles for any new customers.

6. Daily Recommended Workflow Timeline

Time	Department	Operational Action Items
09:30 AM	Accounts / Sales Lead	Open Payment Commitments Follow-up tab. Identify all Overdue and Due Today commitments. Assign collection call lists to field executives.
10:30 AM	Sales Executives	Contact dealers on commitment list. Use Quick Commitment Picker to log committed dates (+3d/+7d/+15d) or trigger WhatsApp reminders.
02:00 PM	Accounts Team	Reconcile daily bank statements (NEFT/RTGS/UPI). Click Pay In on customer rows to log receipts against outstanding balances.
04:30 PM	Sales & Dispatch	Open Credit Limit Exceeded tab. Check orders scheduled for dispatch; withhold shipments exceeding limit until partial payment received.
06:00 PM	Finance Lead	Review Integrated Unpaid / Pending Customer List . Export Excel report to analyze daily receivables reduction against monthly targets.

7. Database Migration SQL Reference

To ensure permanent column persistence in new Supabase environments, click **DB Migration** or execute the following query in the Supabase SQL Editor:

```
-- Supabase Migration: Customer Credit Terms & Payment Tracking
ALTER TABLE customers
  ADD COLUMN IF NOT EXISTS fixed_credit_terms VARCHAR(100) DEFAULT '30 Days Net',
  ADD COLUMN IF NOT EXISTS payment_commitment_date DATE,
  ADD COLUMN IF NOT EXISTS material_received_time VARCHAR(100) DEFAULT 'Within 3-5 Days',
  ADD COLUMN IF NOT EXISTS payment_cycle VARCHAR(100) DEFAULT '15/30 Days',
  ADD COLUMN IF NOT EXISTS order_cycle VARCHAR(100) DEFAULT 'Weekly',
  ADD COLUMN IF NOT EXISTS credit_notes TEXT;

ALTER TABLE sales_invoices
  ADD COLUMN IF NOT EXISTS payment_commitment_date DATE,
  ADD COLUMN IF NOT EXISTS due_date DATE,
  ADD COLUMN IF NOT EXISTS material_received_time VARCHAR(100);
```

8. User Verification Checklist

Status	Standard Verification Item
[OK]	All customer credit accounts maintain fixed credit terms, credit limit, and payment cycles in one place.
[OK]	No separate offline spreadsheets needed for unpaid or pending bill customer lists.
[OK]	Daily overdue commitments tracked via the <i>Payment Commitments Follow-up</i> tab.
[OK]	Quick commitment dates logged in seconds with the row inline date picker.
[OK]	1-click WhatsApp reminders used for proactive dealer payment follow-up.
[OK]	Payment receipts recorded using the pre-filled Pay In shortcut.
[OK]	Offline dealer lists synced anytime via the Import / Sync Excel feature.
